

LevelManager::Reset

LevelManager::Restart

SaveFileIO::GetInformation

```
graph LR; A[LevelManager::Reset] --> C[SaveFileIO::GetInformation]; B[LevelManager::Restart] --> C;
```

The diagram illustrates two separate calls to the `SaveFileIO::GetInformation` method. The first call originates from the `LevelManager::Reset` method, and the second call originates from the `LevelManager::Restart` method. Both calls are represented by blue arrows pointing to the `SaveFileIO::GetInformation` method box.
